

Security Industry Authority

What price do you put on security?

Demonstrate your commitment to public safety with an SIA approved security supplier.

It's not easy to put a price on protecting the public. But it's now easier than ever to appoint the best security supplier available, thanks to the SIA's Approved Contractor Scheme (ACS).

The ACS sets the standard in accreditation of suppliers of manned guarding, key holding and vehicle immobilisation. We provide a more extensive assessment than any other quality accreditations. For a supplier to qualify for ACS status, it must meet 89 different performance criteria covering all aspects of its organisation.

So when you choose an SIA approved contractor, you'll know you're giving the public the highest standards of security available.
